

SITE APPROVAL FORM

Location: Jacksonville, FL			Date: _'	13/2014	
City	State				
Organization: St. Vincent's HealthCare					
*Contact Person(s): Gretchen Guess *Must have at least a Bachelor's degree in	a related field (and a minimum	ı of 2 years' experio	ence within the discipline	
Address:					
Address:Street/PO Box		City	ÿ	State/Zip	
Phone: 904-308-6980	98-6980 Fax: 904-308-7941				
Email: gretchen.guess@jaxhealth.com		Website: www.jaxhealth.com			
What semesters is your organization available ☐ Fall (August-December)		erns? (January-Apr	il) 🔳 Su	mmer (May-August)	
Please check the specializations that best per	tain to the int	ernship expe	rience offered:		
☐ Exercise Physiology	■ Fitness	tness/Wellness			
How many interns do you typically accept per	r semester?	no more than o	one for primary car	e	
Interns must complete a minimum of 35-40 h for your organization. Please indicate any eve				rmal working hours	
8-5, M-F. Possible a few evening or weekend co	mmitments				
Is office space available to interns?	Yes	□ No			
is office space available to interns:	1C3		Comments		
Is a computer/scanner available to interns?	Yes	☐ No			
			Comments		
Does your organization offer paid or non-paid	d internships?	o ■ Non-p	aid 🗌 Paid (ar	nount)	
List other benefits your organization offers in	nterns (i.e. hou	using, health i	insurance, travel	reimbursement, etc.)	
List required purchases for interning with you	ur site (e.g. pa	rking pass, u	niform, back-gro	und check, etc.):	
Appropriate work attire					

List required skills or previous experience necessary for interning with your organization:

Depends on background and position. Success in current field of study, desire to learn and contribute, ability to work independently and take direction.

Special Requirements (i.e. special application, proof of health insurance, immunizations, etc.) *Please note: All interns are required to purchase professional liability insurance coverage for \$1,000,000*

List a description of duties your organization expects to be fulfilled by interns:

Develop, implement, and/or analyzing APK program that has measurable impact on the health of a specified population

Align analysis with national population quality measures

Integrate programs into reform efforts such as patient center medical home

Work with physicians, office staff, and other providers on system implementation

Observe and support system-wide population health initiatives that integrate APK

Observe healthcare system administrative and business discussions

Please describe a typical day for the intern:

Research
Analysis
Program Development
Work with Clinics and Providers
Observe healthcare system

Interns must be evaluated on at least 6 of the following Student Learning Outcomes (SLO's). Please check each SLO that applies to the duties/responsibilities provided to interns at your organization.

Tr.	
APK Student Learning Outcomes (SLOs)	Applied Examples (These examples used to describe each SLO are not exclusive; they are simply intended to provide clarity to the individual SLOs)
Integrate principles and methods of math, social sciences, and arts and humanities to applied physiology and kinesiology, wellness, and/or fitness environments.	 Intern can perform body composition calculations. Intern can identify socioeconomic impacts on health and fitness behaviors. Intern can calculate target and max heart rates in order to prescribe aerobic exercise.
Identify and relate the nomenclature, structures, and locations of components of human anatomy to health, disease, and physical activity.	 Intern can identify muscles used in specific exercises and name other exercises that use those muscles. Intern can name specific structures damaged by pathologies like diabetes.
Identify, examine, and explain physiological mechanisms of homeostasis at various levels of an organism (i.e., cells, tissues, organs, systems).	 Intern can explain the baroreflex. Intern can explain why skeletal muscle cells atrophy when immobilized. Intern can describe the impact of respiration on blood pH.
Investigate and explain the effects of physical activity on psychological health as well as the perspectives used to enhance adherence to healthier lifestyles.	 Intern can explain how exercise helps depression. Intern knows where to locate information related to psychological health impacts of various activities. Intern can identify and properly refer individuals with eating disorders.
Identify and explain the acute and chronic anatomical and physiological adaptations to exercise, training, and physical activity.	 Intern can explain why resting HR and BP are reduced following endurance training. Intern can identify immediate and long-term benefits of resistance training.
Select and utilize the appropriate scientific principles when assessing the health and fitness of an individual and prescribing physical activity based on those assessments.	 Intern can select a safe fitness test for a cardiac patient. Intern can perform skinfold testing and use that data to prescribe appropriate amounts of exercise.
Solve applied physiology and kinesiology problems from personal, scholarly, and professional perspectives using fundamental concepts of health and exercise, scientific inquiry, and analytical, critical, and creative thinking.	 Intern can describe which populations might be prone to ank sprains. Intern can identify medications which might lead to an impaired ability to perform aerobic exercise. Intern can prescribe exercise to suit the goals of clients based on fitness assessments.
Collect, compare, and interpret qualitative or quantitative data in an applied physiology and kinesiology context.	 Intern can perform a submaximal VO2 test and use the collected data to classify the subject's level of fitness. Intern can perform a laboratory experiment and compare the results to other similar studies.
Effectively employ written, oral, visual, and electronic communication techniques to foster inquiry, collaboration, and engagement among applied physiology and kinesiology peers and professionals as well as with patients, clients, and/or subjects.	 Intern can explain to a patient the importance of hydration during exercise. Intern can generate professional emails to ask scientific or medical questions. Intern can generate an abstract to present research at a scientific or medical conference.
Would you like to be added to the Department's list	of approved sites for future interns?
