Overview: *APK 3405 Exercise Psychology* examines the dynamic influences that psychological factors and exercise behaviors exert upon one another. The field of exercise psychology actively promotes the *scientist-practitioner* model. Utilization of the scientist-practitioner model involves the ability to consume and appropriately apply contemporary theory and scientific findings to the practice of applied exercise psychology. Accordingly, APK 3405 content and assignments emphasizes the theoretical and applied perspectives on the science and practice of exercise psychology.

Topics covered include examining how engagement in physical exercise catalyzes neural adaptations that influence stress response, affective experience, cognitive function, sleep patterns & perceptions of pain; how motivation, emotion, and attributions influence exercise behavior; and how intervention programs can be leveraged to systematically improve exercise behavior.

Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodations. Students with disabilities should follow this procedure as early as possible in the semester.

You must submit this documentation prior to submitting assignments, quizzes, or exams. Accommodations are not retroactive, therefore, students should contact the office as soon as possible in the term for which they are seeking accommodations.

Course Etiquette: All members of the class are expected to follow rules of common courtesy in all course interactions as outlined in the UF Netiquette Guide (<http://teach.ufl.edu/wp-content/uploads/2012/08/NetiquetteGuideforOnlineCourses.pdf>).
