Accordingly, APK 3400 will explore how sport psychology science and theory inform practical application of psychological skills interventions.

Topics covered include examining how motivation, emotion, attention, performance attributions, and confidence influence performance; how goal setting, emotion regulation, attention training, attribution training, mental imagery, & practice structures can be incorporated into psychological skills training programs designed to improve performance; and how psychological factors influence teams, leaders, sport injury, and career transition in youth sport, sub-elite sport, and elite sport contexts.
