   Your exams in this course will be proctored using Honorlock. Honorlock is a service that allows students to complete their assessment at any location while still ensuring the academic integrity of the exam for the institution. Using almost any web cam and computer, you can take exams at home, at work, or anywhere you have internet access – if considered a secure location. You DO NOT need to create an account, download software, or schedule an appointment in advance. Review the Honorlock guide for more information.

Honorlock Guidelines:
• You will need a webcam and some type of speakers and microphone.
• **You will need Google Chrome browser**
  - To get started, you will need Google Chrome and to download the Honorlock Chrome Extension. You can download the extension at [www.honorlock.com/extension/install](http://www.honorlock.com/extension/install)
• A stable internet connection is required
• You will need a government issued photo ID or student ID
• No breaks are allowed during your testing session and cell phones and other devices will not be permitted in the testing area.
• No other people are allowed in the area in which the test is being taken.
• **Any unauthorized notes, presence of tablet or cell phone, or other attempts to cheat will abort the test session and will be reported to your instructor – this will result in a zero on the exam and is a student honor code violation.**

**Grade Appeals.** It is your responsibility to review your graded exams when they are returned. After review, students have **one week** to appeal the grade with the instructor. After **one week**, a grade will not be changed. **THERE WILL BE NO EXCEPTIONS TO THIS POLICY.**

**Make-Up Exams:** There will be no individual make-up exams. Students missing an exam will take the general make-up exam given at the end of the semester. This exam will cover material from the entire semester – a cumulative exam. Your grade on this exam will serve as your grade for the missed exam(s). **The make-up exam will be given on Wednesday, April 21, 2021.**

**Students may not use this exam to replace a grade on exams 1 - 3 – students may only sit for this exam if they miss one of the 3 course exams.**

3. **Practical applications:** These fun assignments are designed to provide content application to “every day” experiences. For example, students will be asked to create an adapted sport and brief video discussing the rules of the sport and how all individuals are included in the activity. There will be 10 experience assignments at 10 points each (100 total points). The due dates are indicated on the syllabus. **The assignments are due by 11:59 PM on the due date and will be submitted electronically via Canvas. Assignments will not be accepted late.**

4. **Discussion Posts:** Students will discuss course content prompts and/or video content prompts throughout the semester within the discussion post assignments. There will be five discussion posts at 8 points each (40 total points). **The assignments are due by 11:59 PM on the due date and will be submitted electronically via Canvas. Assignments will not be accepted late.**

**Supplemental Information about Discussion Posts & Replies: by Elle O'Keefe**

- The discussion area is the foundation for two-way communication with your instructors and classmates. The discussion forum is the heart of the online course as it serves as a platform for learning and engaging.
- As an online learner, you hope that your post will draw other students’ attention to validate your opinions, add insight, and build a stronger learning experience. Classmate feedback can be priceless to your learning process as an online student. After you make such an investment, it can be discouraging to see that nobody responded to your discussion post.
- There are a few things online students can do to make your discussion posts stand out to your peers and to your instructors in order to get more responses and help increase your grades. This article will highlight some great tips for creating the perfect discussion post for your online college courses.

**Content**

- **Make sure that your posts facilitate comments.** Sometimes in a discussion forum the questions can be worded so that everyone’s responses are similar. In this case, you will want to go the extra mile by adding a question at the end of your post, so you are facilitating a question and answer-type conversation among your classmates and instructor.
Beyond answering just the questions, incorporate your experiences with a related subject matter. People love to read stories, because it helps them feel an emotional connection to the content.

Current events are an effective way to get people involved in discussion forums. Local or national news stories may tie in perfectly content discussed in your online classroom’s forum. For example, an article about mortgage fraud might be beneficial in a discussion forum about ethical decision making.

Don’t be afraid to intertwine the course content learned in different courses to supplement your discussion forums. Learning is funny: even though we might just think that all courses are taught in isolation, they all really combine as pieces of a larger puzzle.

Ask a thought-provoking question or taking a controversial stand. After you learn the material, you can step back and look how you can apply it in a difficult situation where your original answer might seem counterintuitive. Don’t be afraid to ask the “Yeah, but what if…” questions.

If you say the same thing everyone else says, you can expect the same results. Add something different, something of value, and look at the changes to your response rate.

Formatting

If your post is easy to read, it is likely that more people will read and respond. In such case, if everyone is using single spacing, use single spacing. If everyone is formatting the text to the left, format it to the left. If everyone uses size 3, use size 3. If everyone is using a specific font and color, use the specific font and color. You want to avoid any distracting colors, fonts, or awkward spacing, or other odd formatting. Take a look at your posts, to see how similar they are to your classmates’ posts. If they are quite different, then change them.

Avoid spelling or grammatical errors. You lose credibility and your instructors and fellow students may discount the quality of your posts if your posts are riddled with errors. Don’t let the reader try to interpret what you are saying: say it clear and precise.

Replies. If you want to maximize the amount of responses, respond to several peers each week. First, identify a group of peers whose opinions you value (by judging the quality of their posts and responses to other classmates) and make sure to respond to at least one of the members of that group each week.

Try to respond to every one of your classmates throughout the course. When you show that you value your classmates’ contributions, they will value yours. Remember the saying; the best way to make a friend is to be one. Well, the best way to be responded to in the discussion forum is by providing good responses to your classmates.
