

Q1.
APPLIED PHYSIOLOGY AND KINESIOLOGY (APK)
INTERNSHIP SITE APPROVAL FORM

Q2.

The **Department of Applied Physiology and Kinesiology** (APK) at the University of Florida would like to thank you in advance for taking the time to complete the approval process and your willingness to provide valuable internship opportunities to our students. The Department of APK requires that all **undergraduates** complete a 12-credit internship experience in their final semester of study. The experience requires a minimum of 520 clock hours or 35-40 hours a week for 15 weeks, for the Fall and Spring semesters, or 40-45 hours a week for 13 weeks during the Summer semester. **Graduate** students in the Human Performance concentration may elect to complete between 3 - 9 credits of internship to count towards their degree. Each registered credit of graduate internship requires a minimum of 48 clock hours be completed and a graduate student must register for at least 3 credits in any semester they intend to complete an internship. Therefore, a graduate student will be required to complete between 144 - 432 hours during their internship. Ideally, interns become exposed to the tasks that will be required of them as professionals in the field, as well as receive opportunities to develop their skills and areas of interest. A brief description of our undergradaute and graduate programs is below:

APK Undergraduate Program: Prepares students to function as an exercise technician, exercise specialist, and/or wellness instructor in hospital, corporate, private, or governmental agencies, to pursue graduate study in kinesiology, OR to pursue graduate study in a health profession requiring education beyond an undergraduate degree. The curriculum provides a strong basic science background and requires additional course work in the biological aspects of exercise. Students may pursue internship opportunities in healthcare, research, fitness, or other areas of human performance.

Human Performance (Graduate): The Human Performance concentration is a non-thesis program leading to a Master of Science degree in Applied Physiology and Kinesiology. Its purpose is to train students for careers where they can promote scientifically based exercise, wellness, and psychological factors to enhance health, athletic development and/or movement performance. Furthermore, students may be trained to be an integral part of the health care team that administers, assesses, and develops programs for clinical populations.

Please review the <u>APK Internship Policies and Procedures</u> Document to gain a better understanding of the expectations of students and site supervisors during the experience.

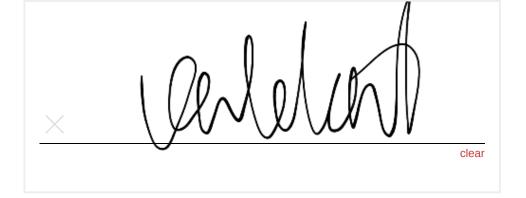

Q5. Organization Name
Sensorimotor Plasticity Lab, APK, UF
Q6. Organization Location(s) - Include Addresses Of All Locations To Be Included As Part Of This Approval
University of Florida, Suite 153 Florida Gym 1864 Stadium Road, Gainesville, FL 32611
Q10. URL of Website For Organization
vahdatlab.org
Q7. Name of Individual Who Will Receive Applications From Students
Shahabeddin Vahdat
Q8. Email Address of Individual Who Will Receive Applications From Students
svahdat@ufl.edu
Q9. Phone Number of Individual Who Will Receive Applications From Students
352-294-1618
Q11. Name of Individual Who Will Supervise Students Directly During Internship and Complete Evaluations
Shahabeddin Vahdat

Q12. Email Address of Individual Who Will Supervise Students Directly During Internship and Complete Evaluations

Q21. List other benefits your organization offers interns (i.e. housing, health insurance, travel reimbursement, etc.)
Depending on your contribution, your name may be included in a published research article.
Q22. List required purchases for interning with your organization (i.e. parking pass, uniform, I.D. Badge, etc.)
None. Lab PPEs will be provided.
Q23. List required skills or previous experience necessary for interning with your organization
Movement Neuroscience course (APK 4144) with a minimum grade of A-
Q24. List any special credentials or documents required to intern with your organization (i.e. CPR/First Aid, Liability Insurance, Personal Training Certification, OSHA training, HIPPA training, Pre-Internship orientation, background check)
Depending on your project (humans or rodents), you will be asked to pass some UF online/hands-on training courses (~ 5-10 hours), before the start of internship
Q25. Provide a bulleted list of duties/responsibilities your organization expects to be fulfilled by interns:
- Conducting experiments on human participants or in rodents - Perform simple analysis of the results - Write scientific and lab reports

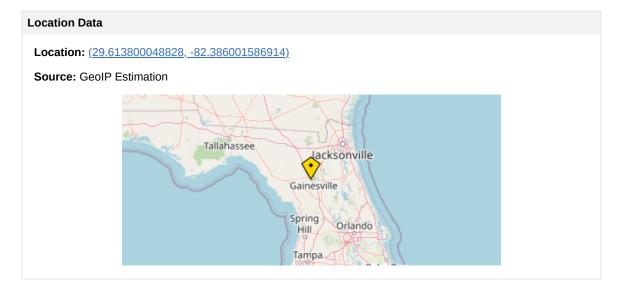

Q26. Please describe a typical day for the intern:

Collecting experimental data at Florida Gym (FLG) on numan particip	ans, of at McKinght Brain institute (MBI) for fourth studies.	
Q28. All Interns (undergraduate and graduate) MUST Learning Outcomes (SLO's), though evaluation of all 9 the duties/responsibilities provided to interns at your or	is preferred. Please check each SLO that applies to	
Integrate principles and methods of math, social sciences, and/or ✓ arts and humanities to applied physiology and kinesiology, health, wellness, and/or fitness environments.	Select and utilize the appropriate scientific principles when assessing the health and fitness of an individual and prescribing physical activity based on those assessments.	
Identify and relate the nomenclature, structures, and locations of components of human anatomy to health, disease, and physical activity.	Solve applied physiology and kinesiology problems from personal, scholarly, and professional perspectives using fundamental concepts of health and exercise, scientific inquiry, and analytical, critical, and creative thinking.	
Identify, examine, and explain physiological mechanisms of homeostasis at various levels of an organism (i.e., cells, tissues, organs, systems).	Collect, compare, and interpret qualitative or quantitative data in an applied physiology and kinesiology context.	
Investigate and explain the effects of physical activity on psychological health as well as the perspectives used to enhance adherence to healthier lifestyles.	Effectively employ written, oral, visual, and electronic communication techniques to foster inquiry, collaboration, and engagement among applied physiology and kinesiology peers and professionals as well as with patients, clients, and/or subjects.	
Identify and explain the acute and chronic anatomical and physiological adaptations to exercise, training, and physical activity.		
Q33. Name of APK student that requested the site app	proval form from you (if applicable)	
Q29. Would you like to be added to the Department's list of approved sites for future interns?		
YesNo		
Q32. Have you reviewed the APK Internship Policies a	und Procedures Manual?	
YesNo		
Q30. Signature of Individual Who Will Be Receiving Int	ternship Applications	

Q31. Signature of Individual Who Will Be Supervising And Evaluating Students During The Internship

Approved - 11.5.21

Blain Harrison
