

UF UNIVERSITY of FLORIDA

Location: New Orleans Louisiana Date: 8/26/15
City State

Organization: Cardiac Rehab Services

*Contact Person(s): Bret J. Berry, M.S.
**Must have at least a Bachelor's degree in a related field and a minimum of 2 years' experience within the discipline.*

Address: 626 Massena St. Mandeville LA 70448
Street/PO Box City State/Zip

Phone: 504-861-9981 Fax: 504-861-9704

Email: cardiacrehabservices@gmail.com Website: www.cardiacrehabservices.com

What semesters is your organization available to accept interns?
 Fall (August-December) Spring (January-April) Summer (May-August)

Please check the specializations that best pertain to the internship experience offered:
 Exercise Physiology Fitness/Wellness

How many interns do you typically accept per semester? 1

Interns must complete a minimum of 35-40 hours per week (520 hours total). List the normal working hours for your organization. Please indicate any evening or weekend time commitments:
6:00am-1:00pm Monday-Friday, 8:00am -11:00am Saturday

Is office space available to interns? Yes No _____
Comments

Is a computer/scanner available to interns? Yes No _____
Comments

Does your organization offer paid or non-paid internships? Non-paid Paid (amount) varies

List other benefits your organization offers interns (i.e. housing, health insurance, travel reimbursement, etc.)
N/A

List required purchases for interning with your site (e.g. parking pass, uniform, back-ground check, etc.):
N/A

List required skills or previous experience necessary for interning with your organization:

4th year B.S. Exercise Science or related field.

Special Requirements (i.e. special application, proof of health insurance, immunizations, etc.)

Please note: All interns are required to purchase professional liability insurance coverage for \$1,000,000

N/A

Provide a bulleted list of duties/responsibilities your organization expects to be fulfilled by interns:

See Attached

Please describe a typical day for the intern:

See Attached

Responsibilities/Tasks - Outpatient Cardiac Rehabilitation

- All administrative aspects related to initial patient intake information and daily progress reports.
- Working knowledge of all equipment used in clinical operations.
- Proper patient interrelation techniques for cardiac rehabilitation.
- Proper methods for obtaining heart rate, oxygen saturation and blood pressure at rest and with exercise.
- Proper determination of body composition analysis through skinfold measurement.
- Correct methods for electrocardiogram electrode placement for cardiac rehabilitation.
- Guidelines for exercise prescription for patients with known cardiovascular disease.
- Knowledge of all cardiovascular exercise equipment and how to determine intensity, duration and proper technique for each.
- Introduction to ECG monitoring and mechanisms for appropriate documentation with regards to cardiac rehabilitation.
- Overview of all educational topics presented to patients in cardiac rehabilitation.
- Knowledge of all clinical forms used in cardiac rehabilitation.
- General overview of all policies and procedures related to cardiac rehabilitation.

Program Hours

6 AM to 1pm Monday through Friday

8 AM to 11 AM Saturday

Independent Study Hours (Cardiovascular Related Drugs, ECG interpret) - 4 hours per week

Interns must be evaluated on at least 6 of the following Student Learning Outcomes (SLO's). Please check each SLO that applies to the duties/responsibilities provided to interns at your organization.

APK Student Learning Outcomes (SLOs)	Applied Examples <i>(These examples used to describe each SLO are not exclusive; they are simply intended to provide clarity to the individual SLOs)</i>
<input checked="" type="checkbox"/> Integrate principles and methods of math, social sciences, and arts and humanities to applied physiology and kinesiology, wellness, and/or fitness environments.	<ul style="list-style-type: none"> • Intern can perform body composition calculations. • Intern can identify socioeconomic impacts on health and fitness behaviors. • Intern can calculate target and max heart rates in order to prescribe aerobic exercise.
<input checked="" type="checkbox"/> Identify and relate the nomenclature, structures, and locations of components of human anatomy to health, disease, and physical activity.	<ul style="list-style-type: none"> • Intern can identify muscles used in specific exercises and name other exercises that use those muscles. • Intern can name specific structures damaged by pathologies like diabetes.
<input checked="" type="checkbox"/> Identify, examine, and explain physiological mechanisms of homeostasis at various levels of an organism (i.e., cells, tissues, organs, systems).	<ul style="list-style-type: none"> • Intern can explain the baroreflex. • Intern can explain why skeletal muscle cells atrophy when immobilized. • Intern can describe the impact of respiration on blood pH.
<input checked="" type="checkbox"/> Investigate and explain the effects of physical activity on psychological health as well as the perspectives used to enhance adherence to healthier lifestyles.	<ul style="list-style-type: none"> • Intern can explain how exercise helps depression. • Intern knows where to locate information related to psychological health impacts of various activities. • Intern can identify and properly refer individuals with eating disorders.
<input checked="" type="checkbox"/> Identify and explain the acute and chronic anatomical and physiological adaptations to exercise, training, and physical activity.	<ul style="list-style-type: none"> • Intern can explain why resting HR and BP are reduced following endurance training. • Intern can identify immediate and long-term benefits of resistance training.
<input checked="" type="checkbox"/> Select and utilize the appropriate scientific principles when assessing the health and fitness of an individual and prescribing physical activity based on those assessments.	<ul style="list-style-type: none"> • Intern can select a safe fitness test for a cardiac patient. • Intern can perform skinfold testing and use that data to prescribe appropriate amounts of exercise.
<input checked="" type="checkbox"/> Solve applied physiology and kinesiology problems from personal, scholarly, and professional perspectives using fundamental concepts of health and exercise, scientific inquiry, and analytical, critical, and creative thinking.	<ul style="list-style-type: none"> • Intern can describe which populations might be prone to ankle sprains. • Intern can identify medications which might lead to an impaired ability to perform aerobic exercise. • Intern can prescribe exercise to suit the goals of clients based on fitness assessments.
<input checked="" type="checkbox"/> Collect, compare, and interpret qualitative or quantitative data in an applied physiology and kinesiology context.	<ul style="list-style-type: none"> • Intern can perform a submaximal VO₂ test and use the collected data to classify the subject's level of fitness. • Intern can perform a laboratory experiment and compare their results to other similar studies.
<input checked="" type="checkbox"/> Effectively employ written, oral, visual, and electronic communication techniques to foster inquiry, collaboration, and engagement among applied physiology and kinesiology peers and professionals as well as with patients, clients, and/or subjects.	<ul style="list-style-type: none"> • Intern can explain to a patient the importance of hydration during exercise. • Intern can generate professional emails to ask scientific or medical questions. • Intern can generate an abstract to present research at a scientific or medical conference.

Would you like to be added to the Department's list of approved sites for future interns? Yes No

Name of student requesting completion of the site approval form (if applicable): _____

I have reviewed the APK Undergraduate Internship Policies and Procedures Manual: yes Date: 8/26/15

Site Signature:  Date: 8/26/15

Department Approval:  Date: 8/31/15
