

SITE APPROVAL FORM

Location: Ft. Myers	FL		Date:	
City	State			
Organization: KAGAN, JUGAN & ASSOCIATES,	PA			
*Contact Person(s): Sue Church *Must have at least a Bachelor's degree in	a related field an	d a minimum oj	f 2 years' experience within the di	scipline
	•	Ft. Mye		
Address: 3210 Cleveland Ave, Ste 100 Street/PO Box		City	State/Zip	
Phone: (239) 936-6778 x 2227		Fax: (239) 93	2 17	
Email: sue@kaganmd.com		Website: kaç	ganortho.com	
What semesters is your organization available Fall (August-December)		rns? anuary-April)	☐ Summer (May-Aug	ust)
Please check the specializations that best pertain to the internship experience offered:				
☐ Exercise Physiology	☑ Fitness/	mess/Wellness		
How many interns do you typically accept per	semester?			
Interns must complete a minimum of 35-40 h for your organization. Please indicate any eve				ours
Monday 8:00-2:00pm, Tuesday 12:00pm-8:00-pm Friday 8:00am-4:00pm	ı, Wednesday 8:	30-4:30pm, Thu	rsday 12:00pm-6:30pm,	
Is office space available to interns?	✓ Yes	□ No		
			Comments	
Is a computer/scanner available to interns?	✓ Yes	□ No		
		(Comments	
Does your organization offer paid or non-paid internships?		☐ Non-paid	1 Paid (amount) \$12-1	4
List other benefits your organization offers interns (i.e. housing, health insurance, travel reimbursement, etc.)				
List required purchases for interning with you	ır site (e.g. park	cing pass, unif	form, back-ground check, etc.):	
none				

List required skills or previous experience necessary for interning with your organization:
Special Requirements (i.e. special application, proof of health insurance, immunizations, etc.) Please note: All interns are required to purchase professional liability insurance coverage for \$1,000,000 none
Provide a bulleted list of duties/responsibilities your organization expects to be fulfilled by interns: Professionalism, promptness, responsible, able to multi task and highly motivated to learning

Please describe a typical day for the intern:

8:00am -5:00pm following and assisting physician with Electronic Medical Records, scribing, preparing prescriptions, assisting with prepping for injections, ultra-sound, etc.

Interns must be evaluated on at least 6 of the following Student Learning Outcomes (SLO's). Please check each SLO that applies to the duties/responsibilities provided to interns at your organization.

APK Student Learning Outcomes (SLOs)	Applied Examples (These examples used to describe each SLO are not exclusive; they are simply intended to provide clarity to the individual SLOs)		
Integrate principles and methods of math, social sciences, and arts and humanities to applied physiology and kinesiology, wellness, and/or fitness environments.	Intern can perform body composition calculations. Intern can identify socioeconomic impacts on health and fitness behaviors. Intern can calculate target and max heart rates in order to prescribe aerobic exercise.		
Identify and relate the nomenclature, structures, and locations of components of human anatomy to health, disease, and physical activity.	 Intern can identify muscles used in specific exercises and name other exercises that use those muscles. Intern can name specific structures damaged by pathologies like diabetes. 		
Identify, examine, and explain physiological mechanisms of homeostasis at various levels of an organism (i.e., cells, tissues, organs, systems).	 Intern can explain the baroreflex. Intern can explain why skeletal muscle cells atrophy when immobilized. Intern can describe the impact of respiration on blood pH. 		
Investigate and explain the effects of physical activity on psychological health as well as the perspectives used to enhance adherence to healthier lifestyles.	 Intern can explain how exercise helps depression. Intern knows where to locate information related to psychological health impacts of various activities. Intern can identify and properly refer individuals with eating disorders. 		
Identify and explain the acute and chronic anatomical and physiological adaptations to exercise, training, and physical activity.	 Intern can explain why resting HR and BP are reduced following endurance training. Intern can identify immediate and long-term benefits of resistance training. 		
Select and utilize the appropriate scientific principles when assessing the health and fitness of an individual and prescribing physical activity based on those assessments.	 Intern can select a safe fitness test for a cardiac patient. Intern can perform skinfold testing and use that data to prescribe appropriate amounts of exercise. 		
Solve applied physiology and kinesiology problems from personal, scholarly, and professional perspectives using fundamental concepts of health and exercise, scientific inquiry, and analytical, critical, and creative thinking.	 Intern can describe which populations might be prone to ankle sprains. Intern can identify medications which might lead to an impaired ability to perform aerobic exercise. Intern can prescribe exercise to suit the goals of clients based on fitness assessments. 		
Collect, compare, and interpret qualitative or quantitative data in an applied physiology and kinesiology context.	 Intern can perform a submaximal VO2 test and use the collected data to classify the subject's level of fitness. Intern can perform a laboratory experiment and compare their results to other similar studies. 		
☐ Effectively employ written, oral, visual, and electronic communication techniques to foster inquiry, collaboration, and engagement among applied physiology and kinesiology peers and professionals as well as with patients, clients, and/or subjects.	 Intern can explain to a patient the importance of hydration during exercise. Intern can generate professional emails to ask scientific or medical questions. Intern can generate an abstract to present research at a scientific or medical conference.
