Question:	**Please provide any additional suggestions and comments.**
Response Rate:	50.00% (**10** of **20**)

1	Loved this class! The teacher is awesome
2	Very nice girl. Sweet and new to teaching but everything is a work in progress. Overall positive impression
3	The professor provides examples that are easy for college students to relate to, which made the class enjoyable.
4	I really enjoyed this professor. The course was rudimentary and required, however the experience was made better with professor Hone.
5	She is a good teacher and aims to help students out as much as she can. She tries to make things understandable and present stats in a way that is manageable.
6	GOOD JOB!
7	I really think it would have helped if powerpoint lectures were more organized and there were less words per slide. I also feel like I got a lot out of the time she did lecture without the powerpoint. I really like the style of lecture towards the end of the semester. One of the things I really liked was how she put tried to give the big picture. To take a step back and actually see what the concept in relation to other concepts. That cleared up the "why" questions for me often. Overall I really liked having her as a teacher. She was very pleasant and always willing to give students help. I will miss the corny jokes that always made me smile.
8	its a hard course. but shes always wiling to help
9	It's more confusing to us when you're confused about a topic or equation, but overall you were a fantastic teacher! Good luck with everything in the future and thank you! :)
10	Best math class I've had.
